**FOR IMMEDIATE RELEASE**

## **Woman-Owned Search Feature Now Available on PartsBase Government Data**

**Boca Raton, FL, 08/21/23** – PartsBase Government Data, an industry-leading data solution provider, is thrilled to unveil a new feature aimed at promoting diversity, equity, and inclusion. Central to this update is the integration of a drop-down search field enhanced with a Woman-Owned filter. This strategic addition solidifies PartsBase's commitment to being a champion for an equitable and level business landscape.

This newest feature, available both on the PartsBase Government Data website and via API, offers PartsBase customers a seamless pathway to identify and extend their support to woman-owned businesses. Such an initiative not only bolsters the visibility of these enterprises but also fosters a diverse and inclusive business ecosystem.

This update has also streamlined the user interface by implementing a drop-down system for applying filters. Now you can easily filter by set-aside categories, such as Woman Owned, Service-Disabled Veteran Owned, and Small Business, among others. The aim? To ensure every search yields tailored results, enabling users to align their objectives with companies that resonate with their ethos.

"In our journey to redefine the data solution landscape, it's imperative to put forward the ideals we cherish into our work. By creating an easy method to champion diversity and inclusivity, our vision where every enterprise, regardless of size or the nature of ownership, receives its deserved acknowledgment and equitable opportunities can be realized." remarked Rodrigo Garcia, Chief Operating Officer at PartsBase.

This update is live and accessible to all PartsBase Government Data subscribers. For those interested

in delving deeper into the Government Data product suite and its myriad features, we invite you to visit <https://www.govgistics.com/Register.aspx>.
